Art Unit: 3744

The following is an examiner's statement of reasons for allowance: the detection of a surge condition in a multiple compressor refrigeration system by comparing the relative inlet vane positions of each compressor and the relative values of an operating parameter of each compressor in order to sense the surge condition of one of the compressors was not taught by the prior art nor would have been obvious to one of ordinary skill in the art at the time the invention was made.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1-30 are allowed.
